WORK EXPERIENCE

Full-stack Developer
Tutoom, Jun 2023 - Feb 2023

I led the migration of the company's main services (real-time whiteboard, collaborative notes, real-time chat, etc) to a more optimal architecture that improved the application loading time by 60%, reduced infrastructure costs and allowed deployment in different regions worldwide

Full-stack Developer
Fiverr Referral, Jan 2023 - May 2023

I led the design and construction of a microservices-oriented architecture for a company in charge of managing garages throughout Latin America that allowed it to serve more than 10,000 active users per day.

Full-stack Developer
Atik Solutions S.A., Mar 2022 - Dec 2022

I developed R.E.S.T APIs that were consumed by a mobile application for large companies in Guatemala. This application was responsible for managing inventory, accounting for sales, and generating electronic invoices.

Javascript Developer
Chamorro Solutions S.A.C., Feb 2021 - Jan 2022

I was part of the development of a web application with microservices architecture for an electronic sales company in Panama, that generated a 17% increase in online sales nationwide.

Web Developer
Freelancer, Apr 2020 - Jan 2021

Development of landing pages and marketing sites with HTML, CSS, JS and Wordpress
